## MUDGUARDS AND BOXES

# De Haan Metaaltechniek

De Haan Metaaltechniek was founded in 1924 in Soesterberg in the Netherlands and has grown in the following years to a chassis builder for commercial vehicles. Around the 1940's they specialised in developing and producing fenders for trucks. In the 1950's, when trailers for personal cars became popular, the 8 to 16 inch fender becomes available in almost every desired design in single axle and tandem.

From the 1970's De Haan focuses on the production of fenders for trucks, trailers, horse boxes and boat trailers. The plastic fender makes it's entrance in the 1990's. In recent years the range has expanded with many types of plastic fenders. Nowadays there is a wide range of fenders in galvanised steel, and checker plate and toolboxes of aluminium and plastic.

Since 2022 De Haan is proud to be part of the AL-KO Vehicle Technology Group (AL-KO VT). AL-KO VT produces and delivers high quality chassis parts and accessories for trailers and stands for functionality, comfort and innovations for more driving safety.

De Haan Profibox Plus	63x30x36
-----------------------	----------

# EXPLANATION

## De Haan Standard Boxes

These boxes are suitable for mounting on the drawbar or inside the trailer bed. The Standard boxes feature a recessed lid, allowing them to open 90 degrees when mounted on the trailer's drawbar.

## De Haan High Loader Boxes

These boxes are suitable for mounting underneath a high loader.

## De Haan Underbody Boxes

These boxes are suitable for mounting underneath a high loader.

## De Haan Ecoline Boxes

The Ecoline boxes stand out due to their use of aluminum checker plate with a thickness of 1.5/2.5 mm instead of 2.5/4 mm, as used in the Standard boxes. This makes them lighter while still being robust and reliable.

## De Haan Gas Bottle Line Boxes

The gas bottle box is designed for transporting gas bottles. Ensure that its use and transportation comply with the necessary regulations and your specific requirements.

## De Haan Black Edition

Specifically designed with a black powder coating for a modern and stylish appearance.

## De Haan Profibox

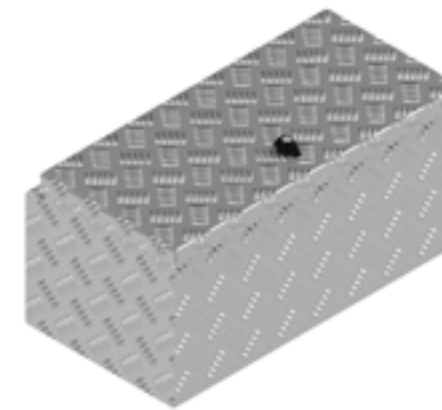

This box is designed to align with the angle of the drawbar. It is available in aluminum checker plate (De Haan Box PBV) and plastic (Profibox Plus).

## Quality

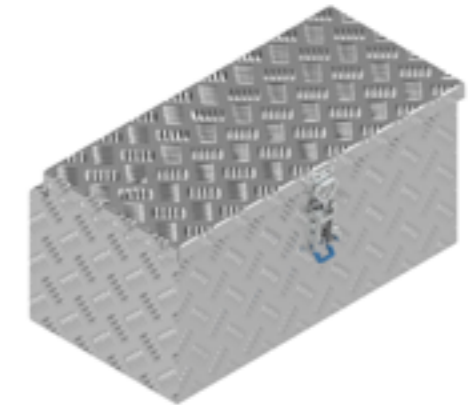

De Haan exclusively uses high-quality materials. Most boxes come with a choice of three types of locks: a butterfly lock, tension lock, or T-lock. The boxes feature an overlapping lid edge and a sturdy rubber seal along the box rim to ensure the contents remain splash-proof and dust-free.
